EXAMINER

THEIN, MARIA TERESA T

ART UNIT PAPER NUMBER

3627

DATE MAILED: 06/06/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/087,627

Applicant(s)

FORMALE ET AL.

Examiner

Marissa Thein

Art Unit

3627

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 March 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 01 March 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 3-1-02.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

158

DETAILED ACTION

Information Disclosure Statement

The information disclosure statement (IDS) submitted on March 1, 2002 is being considered by the examiner. However, the articles "Tables for the Revenue Board" and "Capital Expenditure Analysis" were not considered because the whole articles were not included with the abstract.

Drawings

The drawings filed on March 1, 2002 are acceptable.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim recites the conditional statement "if said average value.....", which renders the claim indefinite since it is unclear to the Examiner what the scope of the claim is when the conditional statement is false. The Applicant should consider rewriting the claim language to avoid the use of conditional statements. For examination purposes, the Examiner will take the broadest reasonable interpretation of the claims and assume the conditional statement is false.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Art Unit: 3627

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

As an initial matter, the United States Constitution under Art. I, §8, cl. 8 gave Congress the power to "[p]romote the progress of science and useful arts, by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries". In carrying out this power, Congress authorized under 35 U.S.C. §101 a grant of a patent to "[w]hoever invents or discovers any new and useful process, machine, manufacture, or composition or matter, or any new and useful improvement thereof." Therefore, a fundamental premise is that a patent is a statutorily created vehicle for Congress to confer an exclusive right to the inventors for "inventions" that promote the progress of "science and the useful arts". The phrase "technological arts" has been created and used by the courts to offer another view of the term "useful arts". See *In re Musgrave*, 167 USPQ (BNA) 280 (CCPA 1970). Hence, the first test of whether an invention is eligible for a patent is to determine if the invention is within the "technological arts".

Further, despite the express language of §101, several judicially created exceptions have been established to exclude certain subject matter as being patentable subject matter covered by §101. These exceptions include "laws of nature", "natural phenomena", and "abstract ideas". See *Diamond v. Diehr*, 450, U.S. 175, 185, 209 USPQ (BNA) 1, 7 (1981). However, courts have found that even if an invention

Art Unit: 3627

incorporates abstract ideas, such as mathematical algorithms, the invention may nevertheless be statutory subject matter if the invention as a whole produces a "useful, concrete and tangible result." See *State Street Bank & Trust Co. v. Signature Financial Group, Inc.* 149 F.3d 1368, 1973, 47 USPQ2d (BNA) 1596 (Fed. Cir. 1998).

This "two prong" test was evident when the Court of Customs and Patent Appeals (CCPA) decided an appeal from the Board of Patent Appeals and Interferences (BPAI). See *In re Toma*, 197 USPQ (BNA) 852 (CCPA 1978). In *Toma*, the court held that the recited mathematical algorithm did not render the claim as a whole non-statutory using the Freeman-Walter-Abele test as applied to *Gottschalk v. Benson*, 409 U.S. 63, 175 USPQ (BNA) 673 (1972). Additionally, the court decided separately on the issue of the "technological arts". The court developed a "technological arts" analysis:

The "technological" or "useful" arts inquiry must focus on whether the claimed subject matter...is statutory, not on whether the product of the claimed subject matter...is statutory, not on whether the prior art which the claimed subject matter purports to replace...is statutory, and not on whether the claimed subject matter is presently perceived to be an improvement over the prior art, e.g., whether it "enhances" the operation of a machine. *In re Toma* at 857.

In *Toma*, the claimed invention was a computer program for translating a source human language (e.g., Russian) into a target human language (e.g., English). The court found that the claimed computer implemented process was within the "technological art" because the claimed invention was an operation being performed by a computer within a computer.

Art Unit: 3627

The decision in *State Street Bank & Trust Co. v. Signature Financial Group, Inc.* never addressed this prong of the test. In *State Street Bank & Trust Co.*, the court found that the "mathematical exception" using the Freeman-Walter-Abele test has little, if any, application to determining the presence of statutory subject matter but rather, statutory subject matter should be based on whether the operation produces a "useful, concrete and tangible result". See *State Street Bank & Trust Co.* at 1374. Furthermore, the court found that there was no "business method exception" since the court decisions that purported to create such exceptions were based on novelty or lack of enablement issues and not on statutory grounds. Therefore, the court held that "[w]hether the patent's claims are too broad to be patentable is not to be judged under §101, but rather under §§102, 103 and 112." See *State Street Bank & Trust Co.* at 1377. Both of these analysis goes towards whether the claimed invention is non-statutory because of the presence of an abstract idea. Indeed, *State Street* abolished the Freeman-Walter-Abele test used in *Toma*. However, *State Street* never addressed the second part of the analysis, i.e., the "technological arts" test established in *Toma* because the invention in *State Street* (i.e., a computerized system for determining the year-end income, expense, and capital gain or loss for the portfolio) was already determined to be within the technological arts under the *Toma* test. This dichotomy has been recently acknowledged by the Board of Patent Appeals and Interferences (BPAI) in affirming a §101 rejection finding the claimed invention to be non-statutory. See *Ex parte Bowman*, 61 USPQ2d (BNA) 1669 (BdPatApp&Int 2001).

Art Unit: 3627

In the present application, claims 1-9 have no connection to the technological arts. The preamble of the claim and the method steps do not indicate any connection to a computer or technology. The preamble and the steps of assigning, selecting, receiving, determining, and correlating are broadly interpreted as manual steps. Therefore, the claims are directed towards non-statutory subject matter, i.e. not within technological arts. To overcome this rejection the Examiner recommends that Applicant amend the claims to better clarify which of the steps are being performed within the technological arts, such as using a digital computing device and the preamble.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Application Publication No. 2002/0082966 in view of U.S. Patent NO. 6,014,640 to Bent.

Regarding claims 1 and 9, O'Brien et al. discloses a method and a computer readable product of classifying an asset, comprising: assigning with respect to each of a plurality of machine types an average value of models of the machine type (paragraphs 155-156; seventh category of asset characteristic is accounting information, which can include purchase price, costs incurred after purchaser, fuel expenses, depreciation and

Art Unit: 3627

other financial and account information, paragraph 158); storing the average values correlated with corresponding machine types in a first computer memory (paragraphs 155-156; Figure 11); selecting a minimum capitalization value (paragraph 159; paragraphs 161-162; paragraphs 166-168); receiving purchase data signifying the acquisition of an asset (paragraph 37); reading and determining a machine type filed of said purchaser order data (paragraph 37); finding in the first memory said average value corresponding to the machine type in said machine type filed of said purchaser order data (paragraphs 159-162; paragraph 165-166); correlating or comparing the average value assigned to machine type and if the average value for the machine type of said acquired asset is greater than or equal to the minimum capitalization value, classifying the asset in one class, if the average value for said machine type of said acquired asset is less than the minimum capitalization value, classifying in another class (paragraph 156; paragraphs 159-162; paragraph 165-167; paragraph 168).

However, O'Brien does not explicitly disclose the asset being classified as a capital asset or a expensed asset. O'Brien discloses target asset which can be chosen by having the analyst select the assets (paragraph 68). The target assets can be selected on the basis of the selected asset possessing a particular characteristics or characteristic data value (paragraph 168).

Bent, on the other hand, teaches the asset being classified as a capital asset or a expensed asset (col. 1, lines 11-15).

Art Unit: 3627

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to modify the method and product of O'Brien to include the classifying of the asset being classified as a capital asset or a expensed asset, as taught by Bent, on order to classify financial transactions and expenses (assets) into useful categories (Bent, col. 1, lines 11-12).

Regarding claims 2 and 12, O'Brien discloses determining all models of said machine type; determining a value of each said models of said machine type; calculating an average value of said models of said machine type (paragraphs 16; paragraphs 37; paragraphs 160-162; paragraphs 166-167)

Regarding claims 3-8 and 13-18, O'Brien discloses weighting said value of each model equally in said average calculation; weighting said value of each model as a function of predicted purchasing trends of models of said machine type; the value of said models are derived from the manufacturer's suggested retail price; the value of said models are derived from the manufacturer's base manufacturing cost; determining the values as of a predetermined date; and the predetermined date is the date of the commercial release of said machine type (paragraph 16; paragraph 37; paragraphs 75-77; paragraphs 158-162; paragraphs 163-167).

Regarding claims 10-11, O'Brien discloses receiving a data stream containing the purchase orders; and reading said machine type out of a data field in said purchase order (paragraph 37; paragraph 156; paragraph 158).

Conclusion

Art Unit: 3627

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 3,933,305 to Murphy discloses asset value calculators.

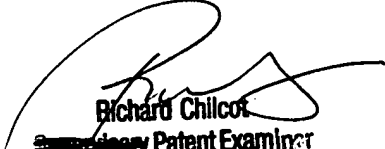

U.S. Patent No. 6,393,406 to Eder discloses a method and system for measuring the performance of elements of a business enterprise and for valuing the elements on a specified valuation date.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marissa Thein whose telephone number is 571-272-6764. The examiner can normally be reached on M-F 8:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Olszewski can be reached on 571-272-6788. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>.
